

SiftView Whitepaper

The product, safety grades, ranks, token creation, promotion, the \$SIFT token and fees.

Prices are the current site settings.

01 Executive summary

SiftView is a charting and discovery site for Solana tokens. It lists new coins with an automated safety grade, shows live charts and lets people trade through Jupiter with their own wallet. Anyone can create a token in one transaction, and every coin has a chat with holder ranks. \$SIFT is SiftView's own token.

02 Product

LIVE NOW

- Charts and token pages with live trades
- Trading through Jupiter: you sign every trade, SiftView never holds funds
- Paid promotions and Permanent Listings
- Rank page and rank share cards
- New Pairs and Listed Tokens, each coin graded A to F
- Create Token: SPL Token, Token-2022 and Bonding Curve
- Coin chats and Command Chat with ranks and pinned messages

03 Safety grades

Every coin in New Pairs gets an automated safety grade. Grades are risk signals, not guarantees or financial advice.

- A Safe.** Passes every check, with a healthy market: rising price, more buyers than sellers, growing volume.
- B Neutral.** Passes the critical checks, with some warnings or a market not strong enough for A.
- C Scam.** Fails a critical check, shows a bundled launch or has a falling market. Hidden unless you choose to show it.
- F Rugpull.** Clear signs of a rug pull, such as a sudden crash or pulled liquidity. Removed from New Pairs.

The checks look at price action and buying versus selling, volume, whether liquidity is locked, burned or pulled, mint and freeze authority, how concentrated the holders are, bundled launches and RugCheck risk flags.

04 Ranks

In chat, a signed-in wallet shows a military rank set by its share of the coin's supply: \$SIFT in Command Chat and the \$SIFT chat, and the coin itself in the chats of coins with a Permanent Listing.

PROMOTION FOR HOLDING \$SIFT

- A wallet holding at least 1,000,000 \$SIFT moves up one rank for every full 24 hours it keeps holding, up to Sergeant Major (E9). Officer ranks always need the balance shown on the ladder.
- Selling or sending any \$SIFT, or dropping below 1,000,000 \$SIFT, resets the streak.

PINNED MESSAGES

A wallet user can pin a chat message by burning \$SIFT. Burned \$SIFT is destroyed. Up to 2 messages are pinned at once, and a bigger burn shows first.

BURN	PINNED FOR
1,000 SIFT	1 min
10,000 SIFT	10 min
100,000 SIFT	1 hr
1,000,000 SIFT	10 hr
10,000,000 SIFT	24 hr

05 Create Token

TYPE	PRICE	NOTES
SPL Token	0.025 SOL	Classic token program with Metaplex metadata. The full supply goes to your wallet.
Token-2022	0.025 SOL	Newer token program, metadata on the mint, optional transfer tax. The full supply goes to your wallet.
Bonding Curve	≈ 0.0185 SOL	Starts trading on a Meteora bonding curve, 1,000,000,000 tokens. Optional first buy in the same transaction. An early-buy fee falls from 99% to 1% over 2 minutes. At 80 SOL, liquidity moves to a Meteora pool and is locked for good.

- SPL Token and Token-2022 cost one flat price that includes all network and rent costs.
- Transfer tax (Token-2022): 0.1% to 5% per transfer; the creator keeps the fees, burns them or uses them to buy back and burn.
- A new Bonding Curve coin gets one free 10-minute pin at the top of New Pairs.

06 Promotion

PACKAGE	PRICE	INCLUDES
Promoted 24h	3 SOL	Pinned for 24 hours · Blue ★ next to your coin
Promoted 48h	5 SOL	Pinned for 48 hours · Blue ★ next to your coin
Promoted 1 week	12 SOL	Pinned for 7 days · Gold ★ next to your coin · Ranked above blue stars · Gold name with sparkles · Gold share image
Permanent Listing	25 SOL	Permanent spot in Listed Tokens · Holder ranks in chat

- Only coins graded A or B can be promoted. A promotion is a paid placement, not a safety grade.
- Wallets that hold \$SIFT get up to 50% off Permanent Listing, based on their share of \$SIFT supply.

07 \$SIFT and transparency

\$SIFT is SiftView's own Solana token. It gives a holder discount on a Permanent Listing, is burned to pin chat messages, and sets ranks in Command Chat and the \$SIFT chat. These public addresses let anyone check SiftView's claims on-chain:

\$SIFT LAUNCH PLAN

In progress

Total supply 1,000,000,000 \$SIFT · mint and freeze authority revoked

ALLOCATION	SHARE	PURPOSE AND LOCK
● Liquidity pool	75% 750,000,000	Paired with SOL at launch. LP position burned. Planned
● Dev	15% 150,000,000	Builder's stake. 6-month lock, then monthly unlocks over 12 months. Locked Cliff Apr 30, 2027 · Ends Apr 29, 2028 Verify on Jupiter Lock ↗ Lock tx ↗
● Treasury	5% 50,000,000	Runs and grows SiftView; funds the \$SIFT buyback. 3-month lock, then monthly unlocks over 12 months. Locked Cliff Jan 31, 2027 · Ends Jan 31, 2028 Verify on Jupiter Lock ↗ Lock tx ↗
● Listings	5% 50,000,000	New exchanges and listing costs. 1-month lock, then monthly unlocks over 5 months. Locked Cliff Nov 30, 2026 · Ends May 2, 2027 Verify on Jupiter Lock ↗ Lock tx ↗

Dev, Treasury and Listings tokens are locked with Jupiter Lock (lock.jup.ag). Verified on-chain: no one can cancel a lock or change its recipient.

LAUNCH LIQUIDITY

Planned

Pool	Raydium concentrated liquidity, \$SIFT / SOL, full range
Initial liquidity	750,000,000 \$SIFT (75%) + 3 SOL
Trading fees	1% fee tier, dynamic fees off, settled in SOL
LP position	Burned via Raydium Burn & Earn: liquidity locked permanently, fees still claimable

All three locks are live and verifiable on lock.jup.ag. The pool address and the LP burn transaction will be published here at launch.

08 Fees

SOURCE	FEE
Trading	0.1% of swaps paired with SOL Not active yet
Create Token	The flat price minus network costs (at least 0.005 SOL)
Bonding Curve	0.01 SOL per coin, plus 50% of its trading fees after Meteora's 20% share
Promotion	The package price

09 Roadmap

Three phases, no dates. Phase 1 is live, Phase 2 is under way, Phase 3 is decided.

SiftView is not an exchange and does not give financial advice. Crypto is high risk; always do your own research.
